

Packstat PS411 is a grey double-sided, visco-elastic acrylic foam tape. The visco-elastic acrylic foam core absorbs and dissipates dynamic and static loads. Due to this unique formulation, this double-sided acrylic foam tape can compensate for thermal elongations of bonded parts.

Product Benefits

- Superior grip strength
- Outdoor and indoor use
- Joining of similar and dissimilar surfaces
- Creates durable and lightweight seals
- Suitable for signage, decorative trim, emblems and sign channel fixing

Main Applications

- Suitable for a wide range of multi-purpose bonding applications
- Suitable for bonding applications such as emblem, decorative part or signage mounting.

Product Properties	Unit	Nominal Value
Thickness	mm	0.8
Short Term Resistance	°C	200
Long Term Resistance	°C	100
Adhesion to Aluminium (After 3 days)	N/m	35
Adhesion to Steel (After 3 days)	N/m	28
